

WHO ARE

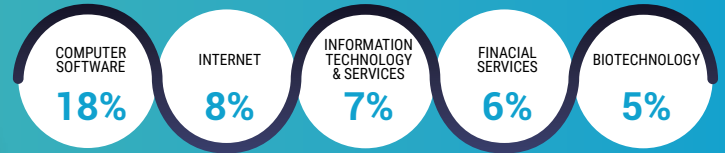

The Data Incubators' Candidates?

The Data Incubator trains exceptional data scientists from all passions and walks of life. Here's a quick glimpse into your next data scientist.

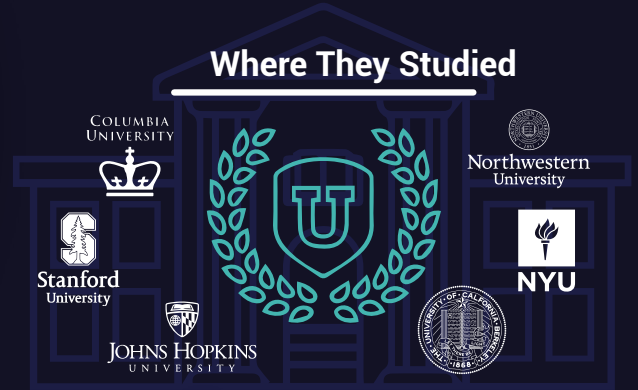

What They Learned

Where They Work

Where They Studied

What They Use

What They Mastered

- Data wrangling
- Large data management
- Machine learning
- Feature engineering
- Model selection
- Deep learning
- Data visualization
- Interactive graphics
- Distributed computing
- Data translation
- Best coding practices

What They Won

- Arthur E Hill Prize in Chemistry
- National Science Foundation Integrative Graduate Education and Research Traineeship
- Controlled Release Society Student Highlights Poster Presenter Award
- Motorola Breaking Mobile Limits
- NASA Earth and Space Science Fellowship
- Emanuel Stein Memorial Award in Economics

What They Build

- "Impact of eCommerce on brick-and-mortar retail"
- "Date Night: a website that helps you find a movie for your date night"
- "Connecting seniors with ridesharing services"
- "Train the computer to determine authorship of a musical score"
- "App to predict game outcomes in Dota 2 based on player choices of characters"
- "Insights into global economic inequality to predict which countries are on the verge of collapse"
